FIVE BANDITS UNDER ARREST ACROSS BORDER

Announcement is Made by General Nafarrate at Matamoros of Arrest of Five Mexican-American Bandits Across River

LARGE PATROLS ALONG BORDER

Mountain Battery Gun is Reported to Have Arrived at Harlingen—May Be Used to Fire at Escaping Bandits

[ASSOCIATED PRESS DISPATCH]
BROWNSVILLE, Sept. 30.—An announcement that five Mexican-American bandits were arrested on the Mexican side of the river was made by Brigadier General Nafarrate, Carranza commander at Matamoros. He said he was investigating the reported gathering of five hundred Mexicans near the Progresso crossing with the apparent intention of invading American territory.

On the American side of the river tonight United States troops continue to maintain large patrols. A mountain battery gun is reported to have arrived at Harlingen from El Paso, General Nafarrate, when asked whether he will take action if American mountain guns fired shells into Mexican territory in attempting to exterminate raiding parties on the river bank, said it was a matter for General Oregon to pass upon.

Nafarrate said he told the Carranza consul at Brownsville to notify the Americans that if they would advise him whenever they chased bandits across the river he would try to have the bandits caught.

Late tonight there were unusual patrol movements along the river. One detachment was ordered out to be at a certain point on the river before daylight with machine guns.

Silliman Ordered Home
VERA CRUEZ, Sept. 30.—John R. Silliman, the president's personal representative in Mexico, has been summoned to the United States. It is assumed he is to participate in the conferences of the Pan-American diplomats with regard to the situation in Mexico.

Silliman received his orders this afternoon and called to tell Carranza good bye. Participation in the conference of the Pan-American diplomats will be pleasing to Silliman, who frequently expressed the hope that he might be called home for that purpose.

Villa Troops Moving
EL PASO, Sept. 30.—Three thousand and Villa troops arrived in Juarez last night from Chihuahua and are expected to leave over the Mexico Northwestern for Casas Grandes sometime today. Since the present movement began thirty-three troops trains have reached Casas Grandes, nineteen of them via Juarez and the balance by way of the Chihuahua division of the northwestern and over the Cuernavaca mountain switchback.

Messages from Casas Grandes yesterday announced the arrival there of General Villa who came direct from Chihuahua over the Northwestern line. General Villa is superintending the movement of his forces which will make the journey overland from Casas Grandes to Sonora. Some six thousand men, including a considerable force of artillery, have already departed at Casas Grandes ready for the western campaign. Among the commanders are those of Generals Jose E. Rodriguez, Santibanes, Jurado, San Roman and Bracamonte.

The abandonment of Torreon, Gomez Palacio and Lerdo, neighboring cities in the Laguna district, was officially announced Tuesday in Juarez by conventionalist officials. The news came in official advices from Chihuahua that troops of Gen. Juan N. Medina, commander at Torreon, had withdrawn and were en route to Chihuahua.

Oregon, according to latest reports, is still 150 miles distant from Torreon, his headquarters being at Hipolito, Coah. A committee of citizens has been sent from Torreon to Hipolito to invite Oregon to occupy the three Laguna cities. Because of torn up railways the occupation is likely to be delayed for some little time. General Raul Madero until re-

Greek Chamber Ratifies General Mobilization Order

[ASSOCIATED PRESS DISPATCH]
ATHENS, Sept. 30.—The action of the government in decreeing a general mobilization of the army was ratified by the Greek chamber in a special session. The chamber also authorized a loan of \$20,000,000. Premier Venizelos said in an address to the chamber that the mobilization of the Greek forces was indispensable on account of Bulgaria's military measures.

BATTLE FOR SECOND LINE OF DEFENSES IS STILL PROCEEDING

FOUR LINERS FOR THE ORIENT TRADE

SAN FRANCISCO, Sept. 30.—Yoyo Kissen Kaisha, operating four liners between this port and the Orient will have ten ships in the trade before the end of the year, according to the announcement of W. H. Avery, assistant general manager of the company. The company bought two steamers, Shingou Maru II and Darien Maru, according to a cablegram received by Avery from Japan and is negotiating the purchase of a third.

GOVERNOR SPRY REPRIVES MAN ON WILSON PLEA

Listens to Eleventh-Hour Request from President in Order That Case of Hillstrom May Be Further Investigated

[ASSOCIATED PRESS DISPATCH]
SALT LAKE CITY, Sept. 30.—On request of President Wilson telegraphed from Washington, Governor Spry granted a reprieve to October 16 to Joseph Hillstrom, sentenced to be shot tomorrow, after having been convicted of murdering J. G. Morrison, a grocer and Morrison's son in January 1914. In answer to the president's message Governor Spry says the reprieve is granted only because the president requested it, and insists that the Swedish minister come here and make personal investigation before October 16, as the Swedish consul here has gone thoroughly into the case and advises he can find no reason why the board of pardons should change its decision.

The governor's action will make it necessary to bring Hillstrom before the district court again, even should the board refuse to commute the sentence after hearing from the Swedish minister, as he still has to be presented. Hillstrom had finished some writing and was laughing with the death watch over a joke when advised that the president had requested a reprieve.

"That's nice," he said, "I'm glad to hear it."

Among the letters Hillstrom wrote was one addressed to Ben Williams, of Cleveland, containing a farewell to the I. W. W. organization in which he said: "I have said time and again I was going to get a new trial or die trying. I have stated my position plainly to everybody. I want justice an inch because I am in the right. Tomorrow I

SAY TWO SCORE DEAD

[ASSOCIATED PRESS DISPATCH]
MOBILE, Sept. 30.—The West Indian hurricane which last night spent its force against New Orleans, took a toll of at least two lives and did extensive property damage in small cities and resorts along the Central Gulf coast, according to advices coming in slowly tonight over the crippled lines of communication.

Most of the loss of life is reported

ARIZONA WINS RECOGNITION AT SOL PRODUCTS EXPO.

(Special to The Republican)
DENVER, Sept. 30.—Road Willie, of Snowflake, achieved the great distinction today at the International Sol Products Exposition here of winning the first prize medal blue ribbon and sweepstake together with the prize of one Simplex straw spreader from the Simplex Spreader company of Kansas City, valued at \$100, for the best bushel of soft wheat. The whole corps of six judges participated in the judgment on this class and the competition was very keen

While Anglo-French Troops at Artois Are Apparently Engaged in Consolidating Ground Won, Greater Battle Progresses

GERMANS ADMIT LOSS OF HILL 191

French Are Not Far from Railroad Triangle, Possession of Which Has Been of Greatest Advantage to the Germans

[ASSOCIATED PRESS DISPATCH]
LONDON, Sept. 30.—While the Anglo-French troops at Artois are apparently simply engaged in consolidating the ground won, opposing the German counter attacks, the battle for the German second line of defense in Champagne—the collapse of which would menace acutely the greater part of the German positions in the west—is proceeding with great stubbornness. At several points the French troops have gained a footing on the second lines, some even went right through, but encountering German reserves, were unable to maintain their progress.

According to the German account, the latter troops were captured and exterminated. The Germans admit the loss of Hill 191, north of Massiges, where the French are not far from the railroad triangle, the possession of which has been of the greatest advantage to the Germans as one of the lines has been used in supplying the Argonne army.

It is believed here that besides the gain of ground both in Artois and Champagne, which improved the position of the allies generally, must soon relieve the pressure on the Russian front and perhaps prevent the Austro-Germans from sending any large force against Serbia.

Already large reinforcements for the German army are arriving in the western theater, their presence already has had the effect of strengthening somewhat the allies' offensive. There is a possibility of an offensive breaking out in some other sections of this front. In fact, the correspondent of the Koelnische Zeitung at German headquarters announces an attack was made east of Auberville, which was repulsed.

General von Hindenburg, while he claims to have made some progress in the operations against Dvinsk, is still a long way from that city. Troops to the southeast of Vilna had better success. They have broken through the Russian position and captured a thousand prisoners. It is believed this is the first stroke in the latest blow against the Russian right and that he intends to advance in a southeasterly direction to Minsk in an endeavor to have been drowned.

NEW ORLEANS HARD HIT BY FURIOUS GALE

Unofficial Estimates Place Damage at Nearly \$2,000,000, With Seven Killed and Over 150 Injured in Hurricane

[ASSOCIATED PRESS DISPATCH]
NEW ORLEANS, Sept. 30.—Unofficial estimates placed the property damage here from yesterday's storm at nearly \$2,000,000 and the loss of life at seven. It is estimated that at least 150 were more or less injured in the collapse of buildings, falling signs and flying glass.

The maximum velocity of the wind was reported by the weather bureau as between 120 and 130 miles an hour. The wind blew at this rate for one minute between 5:30 and 6 o'clock last night. The highest sustained velocity was 86 miles an hour about 5:30 o'clock.

For more than seven hours the hurricane swept the city at the rate of sixty miles an hour. The lowest mark recorded by barometer was twenty-eight at eleven o'clock, the lowest mark ever recorded in the United States, according to officials of the weather bureau. Stairways and large plate glass windows were blown out and many stocks of goods were damaged by the wind and rain. Signs, telegraph, telephone and electric light poles and wires are down and debris from the damaged buildings litter the streets. Hundreds of structures were unroofed and demolished in various parts of the city. In the Cumberland Telephone company's exchange fifteen, mostly girls, were injured when all the windows on

MOBILE IS NOT HARD HIT BY THE HURRICANE

[ASSOCIATED PRESS DISPATCH]
MOBILE, Sept. 30.—With every telephone and telegraph line westward prostrated by the West Indian storm, Mobile today is without information of the extent of the damage at Caden, Bayou, Labatre, Gulfport, Pass Christian and other points along the Gulf. Three families are reported missing at Crab Creek.

Although Mobile escaped the full force of the hurricane a furious south-east gale swept the city and adjacent territory practically the entire night, attaining a velocity of sixty miles per hour.

Timely warnings by the government weather bureau prevented material damage to water craft. One launch may be lost and three coal barges were set adrift.

Practically the entire water front of the city is flooded as a result of the unusually high tide. Citizens were compelled to use wagons and boats in order to reach their offices and business houses in the inundated section, some streets being two or three feet deep.

May Buy Anglo-French Bonds At The Net Price

[ASSOCIATED PRESS DISPATCH]
NEW YORK, Sept. 30.—Although the designated price of the Anglo-French five year credit bonds was fixed at 98 to the public, it developed that virtually anyone who wished to purchase amounts of \$1000 or upward will be able to do so at 96 1/2, the net price to syndicates.

At the same time a method to maintain the price by artificial means at ninety-eight during the life of the underwriters' syndicate, sixty days, was adopted. This was done in anticipation of the possible large offerings of bonds on the market at prices below the figures designated by the underwriters. It is reported the Anglo-French commission insisted that this point be maintained until the entire issue had been underwritten.

Real estate, national banks and financial institutions throughout the city which entered the syndicate of the bonds today to clients at

HUNT THREATENS TO CALL OUT TROOPS IF STRIKE NOT SETTLED

Addressing 3000 Employees at Clifton, Says He Will Have Order if He Has to Call Out Entire State Forces

GET TOGETHER OR GO TO BULL PEN

Settlement Must Be Made, if Not Peacefully, Then Some Other Way, Declares Governor—Returns to Phoenix

(Special to The Republican)
CLIFTON, Sept. 30.—After two days spent in Clifton and Morenci taking the testimony of mine managers and employees, Governor Hunt, Adjutant General Harris and Private Secretary Ladd left Clifton this evening by automobile for Lordsburg, enroute to Phoenix. At five o'clock this afternoon a monster mass meeting held on the library plaza at Clifton at which more than 3000 were present the governor spoke to the assemblage.

The meeting was opened by Organizer Miller who requested a vote on inviting the governor to address the crowd. The vote was unanimous for the governor to speak. While an auto was sent to the hotel for the governor, Miller addressed the crowd. A large number of Mexicans were wearing hat bands inscribed, "Hurrah for Governor Hunt."

The governor said in part as follows: "I came here at the request of the sheriff of the county to see if I could not bring my influence to solve the difficulty that has been before you for the past two weeks. I have been in constant communication with the sheriff of this county and so far he has maintained order. I am proud that I am governor of this state and feel that we have all been acting in the right manner. I feel that this situation will be cleared up and for the last two days I have been interviewing the companies and the employees and two days of constant effort on my part has been spent to see if it was possible if the situation could be cleared up.

I find conditions existing here that do need adjustment. I feel that the men who have charge of these great works will be amenable to reason and I believe they will meet you on common ground and I want to say, friends, while I am governor of this state and you have elected me to this high office, I want you to understand as well as all officials to understand that when I come back to this community, and have to bring troops the principal officers of companies will be no different than the poorest Mexican they control. I hope all of you realize I am going to have order if I have to call on every troop we have in the state of Arizona. These words

STIKERS IN RIOT

[ASSOCIATED PRESS DISPATCH]
CHICAGO, Sept. 30.—Scores of persons were arrested and one ten-year-old boy lost his life as a result of the garment workers strike. Leo Schroeder was crushed to death in the collapse of a shanty which he had entered to escape a shooting affray by strike sympathizers.

A mob of five hundred invaded the

SAY CALLAGHAN'S APPEAL IS ENTIRELY WITHOUT AUTHORITY

Alleging that the appeal of State Auditor J. C. Callaghan in the appropriations case is frivolous and unwarranted, that it is being prosecuted without authority of law, and is hindering and delaying the administration of the state's affairs, the attorney general yesterday filed motion in the supreme court to dismiss the appeal.

The motion after reciting the facts in the case, asks that the appeal be dismissed on five grounds: the first of which is that the appeal is frivolous, Callaghan and his bondsmen, it is stated, are fully protected by the judgment of the superior court and have no personal or pecuniary interest in the appeal. Secondly, it is alleged that the state of Arizona is the only party in interest and the real and only party affected by the correctness or incorrectness of the judgment of the lower court. Callaghan, the third reason says, is assuming to act for the state without the authority and against the wishes of the attorney general, who is by law the only proper officer to take action.

The expenditures involved in the auditor's appeal and his employment of counsel, the motion states, are without authority of law and contrary to the provisions of the constitution of the state. Furthermore, the motion adds, the appeal is hindering and delaying the administration of the

(Continued on Page Five)

GOVERNOR BACK TO SIGN CHECKS

The governor's return to Phoenix today from Clifton, where he went to investigate strike conditions, is for the purpose of signing the salary warrants due today and attending to other important matters, according to an announcement made yesterday at the state house. It is expected that he will return to the strike district in a few days.

THOUSANDS ARE RECEIVED BY THE PRESIDENT

Through Misunderstanding Throongs Admitted to the White House During Encampment and President is Equal to Occasion

[ASSOCIATED PRESS DISPATCH]
WASHINGTON, Sept. 30.—Kansas City was selected for the 1916 encampment of the G. A. R. and the election of officers for the coming year will be held tomorrow. While the business of the session was in progress thousands of veterans and their families flocked to the White House. There, through a misunderstanding, what had been planned as a brief reception to a few hundred members of the organizations affiliated with the G. A. R., developed into a rush during which nearly five thousand old soldiers and their wives

shook hands with the president. Arrangements were made for the president to greet the members of the Loyal Legion, the Association of Ex-Prisoners of War, officers of the Union Army and members of the Women's Relief corps. The report gained circulation, however, that all G. A. R. visitors were invited and to add to the confusion many of those in the crowd wore badges which it is said were sold to them at twenty-five cents a piece, with the understanding that the badges would admit them to the White House. Excited men and women clamored for admission at all gates where the policemen had instructions to admit only those wearing certain badges. When the trouble was at its height, Secretary Tamm hurried out and restored quiet by ordering that everybody be permitted to enter.

Considerable routine business was transacted during the encampment's business session. Tonight a number of committee meetings, camp fires, reunions

WIRELESS TALK OVER OCEAN TO HAWAIIAN ISLE

Distance from Atlantic Seaboard to Hawaii, 4600 Miles, is Overcome by the Wireless Transmitting the Human Voice

(Special to The Republican)

NEW YORK, Sept. 30.—Wireless telephony from the Atlantic seaboard to Hawaii, a distance of 4600 miles is an accomplished fact. By the special wireless telephone development which has been made by the engineers of the American Telephone and Telegraph company and of the Western Electric company, speech was transmitted last night from Washington to a wireless station near Honolulu. If anything further was needed to show the wonderful capacity of these new discoveries by the engineers of the Bell system, this last triumph coming but a few hours after Mr. Vail, the president of the company, had talked by wireless from Washington to Mr. Carty, its chief engineer, located at Kaneohe, near San Francisco, is conclusive. The distance over which this wireless communication was held is greater than the distance from New York to London, New York to Paris or from New York to many other important points such as Rome, Vienna and Berlin.

That trans-Atlantic wireless telephone communication is assured as soon as the disturbed condition in Europe will permit of tests from this country to there is obvious when it is remembered that all scientists agree on the fact that it is much more difficult to send wireless telephone communications across land than across water. This wonderful wireless telephone message from Washington to Hawaii had to pass over the whole of the United States, a distance of 2,500 miles before it encountered the more simple wireless conditions which exist when sending over large bodies of water. For the purpose of this test the sending was done from the navy wireless station at Arlington, just outside of Washington. The receiving was done on a small wireless antenna specially erected for the engineers of the telephone company, which, by permission of the naval authorities was located at the United States naval station at Pearl Harbor, Hawaii.

I., and a small tower borrowed for the purpose from private owners at Wilmington, Delaware. Soon after that they talked over 1000 miles, in this case using the experimental tower at Montauk Point and an experimental tower erected at St. Simons Island, Ga. The results of these tests so conclusively demonstrated the correctness of the experimental tower which they had erected near Montauk Point, L. I., and a small tower borrowed for the purpose from private owners at Wilmington, Delaware.
